PROJECTS

College Recruitment System

The college recruitment system simplifies job applications and placements for students and companies, managing details efficiently. Students apply for jobs matching their interests, companies select candidates, and recruiters verify credentials, streamlining the process.

Counterfeit Currency Detection

This paper recommends CNNs for detecting counterfeit currency by analyzing bill images, crucial in addressing the global economic risk posed by fake money. By training CNNs to identify counterfeit patterns, it aims to automate detection, supporting institutions like the Reserve Bank of India.

Facial and Voice Recognition Based security and Safety System in Car

This security system employs facial recognition technology to prevent vehicle theft. A hidden webcam captures the driver's face, comparing it with saved images. If authenticated, the driver gains access; otherwise, the steering wheel locks, and an alert with the unauthorized person's image and car location is sent to the owner. Speech recognition further enhances safety measures for car unlocking.

TECHNICAL SKILLS

PROGRAMMING LANGUAGE - PYTHON ,JAVASCRIPT

WEB TECHNOLOGY - HTML,CSS

OPERATING SYSTEM - WINDOWS , LINUX

IDE-Visual Studio Code,Pycharm

PERSONAL SKILLS

Good communication skills

A Fast learner

Ability to establish personal skills

Interpersonal skills

Team Work

CERTIFICATES

ELITE NPTEL Certificate in An Introduction to Cloud Computing

ELITE NPTEL Certificate in An Introduction to Internet of Things

Infosys Springboard Python course

Online Game Development Workshop by Toonz animation academy

Workshop on React by Kompetenzen

Python course certificate from Networkz System
